*Through its Sustainable Forest Management Plan, TFL44GP is committed to using herbicide on less than 0.2% per year of its defined forest area of 136,960 ha. During the previously approved PMP period, (2014-2019), TFL44GP treated a yearly average of 0.014% of the defined forest area. Future planning estimates a similar usage pattern over the term of the PMP.*
