SPECIES CHARACTERISTICS

Affordably priced, Hem-fir structural timbers are a cost-effective choice for builders, architects and discerning homeowners seeking both functionality and beauty in their projects. Hem-fir is also highly workable. It sands smoothly, glues well, and securely holds nails and screws. Hem-fir structural timbers are primarily available in #2/Btr grade.

TIMBERS - S4S or ROUGH - #2/Btr

FINISHING AND MAINTENANCE

- Western hem-fir timbers contain minimal pitch or resin and can take most stains and finishes well.
- For best results coat all six sides before installation.
- Fasteners with corrosion resistance or membrane should be used.
- Allow product to acclimatize to the environment where it will be installed to avoid unwanted shrinkage or expansion.

Finishing and maintenance guidelines are provided for general informational purposes only. For specific advice on finishing and maintenance, please consult with a qualified professional.
