

Western Timbers

HEM-FIR

Western Forest Products is a trusted leader in natural wood products, known for its uncompromising quality and craftsmanship. Every product bearing the Western name meets some of the highest standards in fiber consistency and manufacturing excellence. Our hem-fir timbers are designed for those who value both performance and aesthetics, offering a refined, natural look that supports individual style without sacrificing durability.

WHY IS HEM-FIR IDEAL TO WORK WITH?

Easily Pressure Treated – improves durability of the species

High Density – provides strong nail and screw holding properties

Strong - ideal for a variety of structural and industrial uses

SPECIES CHARACTERISTICS

Hem-fir boasts a light, honey-colored appearance and a uniform, tight grain. As a non-resinous species, hem-fir takes most stains and finishes well. It sands smoothly, glues well, and has a high nail and screw holding capacity.

FINISHING AND MAINTENANCE

- Western hem-fir timbers contain minimal pitch or resin and can take most stains and finishes well.
- For best results coat all six sides before installation.
- Fasteners with corrosion resistance should be used.
- New hem-fir timbers that will be finished should be protected from the weather before finish is applied.
- Allow product to acclimatize to the environment where it will be installed to avoid unwanted shrinkage or expansion.

Finishing and maintenance guidelines are provided for general informational purposes only. For specific advice on finishing and maintenance, please consult with a qualified professional.
