SPECIES CHARACTERISTICS

Japanese Cedar (Sugi) is a renowned softwood that is grown in managed forests throughout Japan. It is a species that is ideally suited for use in fencing and other exterior structural appearance applications. Western's Japanese Cedar Fencing is supplied in kiln-dried form and has excellent working properties.

4" x 4"	3-1/2" x 3-1/2"	Rgh/ Rgh	Rough	Yes	6'	N/A	24/ 12

FINISHING AND MAINTENANCE

- When choosing a finish, be sure that it contains Mildewcide/ Fungicide as it protects against ultraviolet (UV) light and provides water repellency.
- Use varnishes or other types of film forming coatings are not recommended. These coatings can crack and peel, and once applied are difficult to remove.
- Prepare the wood by sanding the surface with 80 grit sandpaper.

- Finish should be applied to all six sides.
- Maintain your fencing by keeping it free of dirt and debris

Finishing and maintenance guidelines are provided for general informational purposes only. For specific advice on finishing and maintenance, please consult with a qualified professional.
