Western Forest Products is a trusted leader in natural wood decking and outdoor living products, known for its uncompromising quality and craftsmanship. Every product bearing the Western name meets some of the highest standards in fiber consistency and manufacturing excellence. Designed for those who value both performance and aesthetics, Western products offer a refined, natural look that supports individual style without sacrificing durability.

WHY IS YELLOW CEDAR IDEAL TO WORK WITH?

Rot Resistance – yellow cedar has naturally-occurring, rot repelling tannins and oils.

Durability – one of the most durable cedar species in the world.

Cool Underfoot – stays comfortable in direct sun.

SPECIES CHARACTERISTICS

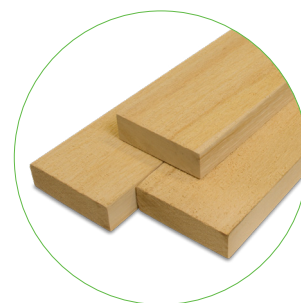

Yellow cedar provides excellent durability, providing enduring beauty to architectural projects ranging from docks and boardwalks to decks and outdoor structures. Thanks to its naturally occurring rot-repelling tannins and oils, this species is insect-resistant and stands up to harsh weather.

4" x 4"	3-11/16" x 3-11/16"	RH	KD	8'-20'	Knotty

FINISHING AND MAINTENANCE

- Yellow cedar can be allowed to weather naturally to a silvery grey look.
- If applying a finish, for best results coat all six sides before installation.
- New cedar products that are going to be finished should be protected from the weather before finish has been applied.
- Allow product to acclimatize to the environment where it will be installed to avoid unwanted shrinkage or expansion.

Finishing and maintenance guidelines are provided for general informational purposes only. For specific advice on finishing and maintenance, please consult with a qualified professional.
